PROFESSIONAL SUMMARY

Software Engineer with 3+ years of professional experience building and shipping customer-facing web applications using React, Next.js, Angular, and TypeScript. Proven track record of delivering production features across CRM workflows, authentication systems, and API integrations. Currently pursuing MSc in Computer Science at the University of Colombo.

EXPERIENCE

Mathemly | Software Engineer *Apr 2025 – Present*

- Built and shipped 5+ customer-facing modules in React and Next.js, implementing responsive layouts, multi-step form flows, and input validation that reduced user-reported form errors.
- Integrated frontend with Strapi CMS and backend REST APIs, aligning API contracts across 10+ endpoints to eliminate data inconsistencies between UI state and server responses.
- Developed end-to-end CRM workflows covering lead capture, customer onboarding, and opportunity tracking with authentication persistence, role-based access, and structured error handling.
- Created a library of 15+ reusable UI components with standardized prop interfaces, reducing feature development time for new modules.

Random Software | Junior Software Engineer *Jul 2024 – Dec 2024*

- Delivered Angular frontend features and AWS-backed services for a large-scale SaaS platform serving clients across the USA and Canada.
- Shipped product updates and production fixes within 2-week Agile sprints, collaborating with cross-functional teams of 8+ engineers, designers, and product managers.
- Resolved 15+ critical production issues through hotfixes, reducing customer-reported defects and improving platform stability.
- Built and maintained Cypress end-to-end test suites covering core user flows, strengthening release quality and reducing regression bugs.

Syntax Genie | Intern Software Engineer *Oct 2022 – Mar 2023*

- Developed React-based interfaces and Firebase backend integrations for customer-facing application features, handling real-time data sync and user authentication.
- Contributed to debugging and performance optimization efforts that improved page load times and application reliability.

EDUCATION

University of Colombo — MSc in Computer Science *2025 – 2027*

University of Bedfordshire — BSc (Hons) Computer Science & Software Engineering — Second Class Upper *2020 – 2023*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Frontend: React, Next.js, Angular, Tailwind CSS, Figma

Backend & APIs: Node.js, Express.js, NestJS, Strapi, Firebase, REST APIs, WebSockets

Cloud & DevOps: AWS (S3, Lambda, CloudFront), Docker, GitHub Actions

Databases: MongoDB, PostgreSQL, Redis

Testing & Tools: Cypress, Jest, Git, Jira, Bitbucket
